

MONTEVIDEO VA MEDICAL CLINIC – MONTEVIDEO, MN

PROGRAM REQUIREMENT

The Montevideo VA Medical Clinic needed a design / built medical services building with two distinct functions – patient services and clinical support. A component of the design requirement was to minimize patient movement while maximizing the ability of medical practitioners to move quickly from patient to support services.

DESIGN SOLUTION

Through Satellite Shelters' industry leading design / build process, material and labor costs were controlled through the use of permanent modular technology. The building utilizes eight 14' x 70' modules placed on a perimeter wall foundation at grade level. Simultaneous to factory construction of building components, we oversaw the necessary site, mechanical and foundation work that helped speed time to occupancy.

BUILDING FEATURES

Patients and employees enjoy a bright and welcoming facility. The building is replete with architectural details, amenities and features that reinforce the professional care provided.

- Private offices, 8 exam rooms, 5 physician/nurse offices, procedure and recovery rooms
- Patient friendly design, built on grade eliminating the need for steps or ramps
- 4:12 Pitch roof with a standing seam metal finish
- Basement foundation facilitated mechanicals run beneath the floor joist
- Maintenance-free stucco exterior finish with aluminum pre-finished overhang

RENT, LEASE OR PURCHASE

We have rental, lease and purchase options available to meet your needs.

SATELLITE SHELTERS

For over 35 years, Satellite Shelters has been a national provider of temporary and permanent space solutions including mobile offices, modular buildings, ground level offices, containers and blast resistant modules.
