

NAVAL REACTORS FACILITY - IDAHO FALLS, ID

Modular Building Institute 2008 Award of Distinction Winner

PROGRAM REQUIREMENT

The United States Navy needed a permanent administrative office that was cost-effective, energy efficient and would remain maintenance free for years to come.

DESIGN SOLUTION

Through an industry leading design/build process, Satellite Shelters created a solution that accommodate the large engineering and administrative staff. Innovative technologies were used to protect the building occupants and the communication network required by the Naval and Government workforce. An updated climate control system ensured a comfortable environment throughout the building. The brick and EIFS exterior with commercial grade aluminum framed windows will provide years of maintenance free use for the owner.

BUILDING FEATURES

- 28,000 square feet
- Interior cubicles in four separate areas
- Large conference room on each floor
- Glass heated vestibule at the main entrance
- Lobby and elevator supplemented with stairways in the center of the building and at both ends
- Gabled canopies with matching standing seam metal roofs provided at all doors
