

Rolls Royce Energy Systems - Project ARRAN Office Building Mount Vernon OH 43050

PROGRAM REQUIREMENT

Rolls Royce Energy Systems required a new technical center in which to provide a state of the art facility conducive to the needs of their technical engineering staff at the Rolls Royce Mount Vernon facility. The new building required a cost-effective, energy efficient solution designed to meet their current as well as future needs.

DESIGN / BUILD SOLUTION

Through an industry leading design / build process and in collaboration with Rolls Royce and JBA Architects, Satellite Shelters created a solution that accommodated a large engineering staff. Innovative technologies were used for data and communications networks that were required by Rolls Royce. An updated HVAC system was installed to allow for central station monitoring of the building environment. The open concept working environment is conducive to the culture established by Rolls Royce allowing greater collaboration between all team members.
