

SUMMIT COUNTRY DAY SCHOOL – CINCINNATI, OHIO

PROGRAM REQUIREMENT

A major snowstorm collapsed the roof of Summit Country Day School resulting in several displaced students. Administrators needed to find an immediate space solution for the three, third grade classrooms that no longer had a home. Satellite Shelters completed this project within two weeks as requested, while working in near zero degree weather.

DESIGN SOLUTION

The Satellite construction and design team developed a plan in concert with educators and city officials to expedite the delivery and construction of a temporary facility that would be ready for occupancy in ten days after the roof collapsed. By joining three, double wide modules, faculty and students enjoyed classrooms that provided the flexibility and natural light that was missing from their previous building. Teachers even had the chance to request special classroom modifications to minimize the temporary feel of the buildings.

BUILDING FEATURES

- Three, 24' x 60' DW classrooms
- Large windows created a bright and airy learning environment
- Wood paneled exterior, skirting and two 70-foot long decks minimized the temporary nature of the buildings
- Simplified utility hookup design minimized cost and expedited project completion

RENT, LEASE OR PURCHASE

We have rental, lease and purchase options available to meet your needs.

SATELLITE SHELTERS

For over 35 years, Satellite Shelters has been a national provider of temporary and permanent space solutions including mobile offices, modular buildings, ground level offices, containers and blast resistant modules.
