

What Is A “Level Site”

And Why Do I Need One?

A level site helps ensure the integrity and safety of your Mobile Office Trailer. Prior to delivery of your building, your site should be prepped so the ground slope is level. With a site properly level, the steps to your building will be sturdy and safe for use by your team and the building will remain secure and structurally sound.

A Level Site Should Have No More Than 1” Change In Elevation Over 10’ - 12’ In Any Direction.

Your site may not be level if...

- The steps aren't in line with the door
- The stairs have sloped at an angle
- There are more blocks on one side than the other

Signs your site is level...

- The door shuts and latches properly
- The steps are flush against the building

Satellite Shelters, Inc.
